

5 Ways To Wellbeing

Self Care Introduction Questionnaire

Self-Care Questionnaire

Self-care is personal health maintenance. It is any activity that we do with the intention of improving or restoring health and it helps us treat or prevent disease and supports good health and wellbeing. You may find that you already do many things as part of your day-to-day routine.

5 benefits of self-care

Slowing down as part of a self-care routine makes you more productive.

Self-care will help boost your immune system.

Self-care improves your self-compassion.

You'll find out who you really are. How many times do you stop and think, what do you LOVE to do?

You will have more to give others. Not less.

This questionnaire will help you see how well or how frequently you practice the different elements of self-care. This will help you learn about your own self-care and recognize areas of your life that may benefit from improvement. The aim of this is to help you learn about your own self-care and recognizing areas of your life that may benefit from improvement.

There are no right or wrong answers. The aim is just to identify areas for improvement. There may be parts of the questionnaire that you may not have any interest in and that's okay. There may be other things that you do that aren't on this list, but it is for you to think about your own wellbeing.

Please circle which one describes you best:

1. I rarely do this or not at all
2. I do this okay or sometimes
3. I would like to improve on this
4. I do this well or often

Physical self-care

1 2 3 4 Eat healthily
